Professional Summary

Technology leader and hands-on software engineer with 20+ years of experience designing, developing, and scaling web applications, enterprise systems, and digital products. Combines strong full-stack and backend engineering expertise with technology strategy, product development, engineering leadership, and team mentoring.

Experienced in designing high-availability architectures, developing microservices-based platforms, accelerating product launches, and leading technology initiatives across AI, logistics, e-commerce, brand intelligence, finance, and business platforms.

CORE COMPETENCIES

- Technology Strategy and Roadmapping
- Software and Solution Architecture
- Full-Stack and Backend Development
- High-Availability and Scalable Systems
- Microservices and API Architecture
- Product Research and Development
- MVP Development and Delivery
- System Performance Optimization
- Database Design
- Technical Leadership and Advisory

SKILLS & EXPERTISE

- Programming Languages : Java, Python, PHP, JavaScript, TypeScript, Kotlin, SQL
- Backend : Django, Laravel, Node.js, REST APIs, Microservices
- Frontend : React, Vue.js

- Cloud, DevOps & Tools : Linux System Administration, Docker, Git, CI/CD, Nginx, Redis
- Database & Search : MySQL, PostgreSQL, ElasticSearch (ELK Stack)
- Core Competencies : System Architecture, AI/LLM Integration, Performance Optimization, Agile Leadership
- Languages : Indonesian (Native), English (Fluent)

SELECTED PROFESSIONAL EXPERIENCE

Tech Consultant

Petruck.id | March 2026 – Present

- Spearheaded architecture planning, technical strategy, and implementation guidance for an AI-powered logistics platform.
- Redesigned the technical delivery approach, reducing the projected time-to-market from three months to six weeks.
- Guided internal engineering teams on clean code standards, scalable API design, and database optimization.
- Help align technology decisions with product priorities, scalability requirements, and business objectives.

Chief Technology Officer (CTO)

RVARE | Aug 2025 – Present

- Define the technology vision, product architecture, and engineering roadmap for an AI-powered crisis and reputation monitoring platform.
- Led and contributed hands-on to the development of the initial MVP using React, Django, and PostgreSQL, completing delivery within two months.
- Designed a modular and scalable architecture to support data growth, service reliability, and future high-availability requirements.
- Translate customer and business requirements into product capabilities and engineering priorities.
- Establish technology standards and guide the platform's long-term technical development.

Lead Backend Developer

BoringAI.io | July 2024 – November 2025

- Led backend development for an AI marketplace platform.
- Designed high-availability backend services using a scalable, microservices-based architecture.
- Translated product requirements into reliable backend capabilities and system integrations.

Chief Technology Officer (CTO)

Mebiso.com | July 2022 – March 2024

- Led technology strategy and product development for a digital brand-monitoring platform.
- Reduced data retrieval time from nearly nine seconds to tens of milliseconds while improving analysis accuracy by approximately 60%.
- Served as a hands-on Full-Stack Developer and Project Leader, building a scalable, microservices-based application.
- Directed product research and development while mentoring interns through practical software-development projects.

Additional Product and Technology Leadership

FNI.com — Technology Lead | February 2025 – March 2026

Led full-stack development, product R&D, and scalable architecture development for a high-availability e-commerce platform.

BisnisOn.com — Chief Technology Officer | July 2018 – September 2022

Managed the IT team, led full-stack product development, delivered software enhancements and releases, and coached interns and new employees.

Education

Master's Degree in Financial Management

STIE Malangkeucwara

Bachelor's Degree in Mathematics and Computer Science

Universitas Gadjah Mada
